

# Beckman Coulter LH 750 Hematology Analyzer

## Features at a Glance

- Superior technologies for NRBC enumeration and random access capabilities
- LH 7500 eliminate manual pre-sorting of samples and speed results to clinicians
- Uses AccuCount technology from Beckman Coulter
- Improved productivity with WBC linearity that extends from zero to 400000
- Platelet linearity that extends from zero to 3000000
- Increase clinician confidence at clinical decision thresholds without additional costly testing protocols

## Product Description

The **Beckman Coulter LH 750 Hematology Analyzer** features performance and results that will exceed all your expectations!

The **LH 750 analyzer hematology analyzer from GMI** is equipped with superior technologies NRBC enumeration and random access capabilities. These advancements help high-volume labs eliminate manual pre-sorting of samples and speed results to clinicians. With this **hematology system** you can improve overall efficiency while maintaining the highest degree of testing accuracy.

Improve cell enumeration accuracy with AccuCount technology from Beckman Coulter

The **Beckman Coulter LH 750** provides improved productivity with WBC linearity that extends from zero to 400000 and platelet linearity that extends from zero to 3000000. The **LH 750 Hematology analyzer**

will increase clinician confidence at clinical decision thresholds without additional costly testing protocols and enhance productivity with a reduction in false-positive results and confirmatory tests

The **LH 750** hematology will simplify and automate NRBC enumeration and eliminate the use of additional reagents since NRBCs are automatically enumerated with every CBC/diff. You can now identify and enumerate NRBCs without manual intervention. The **Beckman Coulter LH 750 Hematology Analyzer** will improve productivity by reducing the need for technologist intervention and sample re-runs.

Obtain precise and accurate WBC counts with automatic interference correction Streamline Data Management with Improved Decision Support Standardize laboratory processes across all shifts with user-defined decision rules. Customize the system to meet your lab's needs and specific patient populations with flexible differential flagging.

Receive Unparalleled Service and Support Increase up-time and productivity with on-board diagnostics and troubleshooting assistance or with PROService Remote Diagnostics support Receive top-quality customer support through our telephone on-line or on-site services.
